

South Barents and Ludlov Saddle Assessment Unit 10500102

-  South Barents and Ludlov Saddle Assessment Unit 10500102
-  South Barents Basin Geologic Province 1050
-  Other geologic province boundary

USGS PROVINCE: South Barents Basin (1050) **GEOLOGIST:** S.J. Lindquist
(Petroleum system also includes North Barents Basin 1060, Ludlov Saddle 1059, and part of Timan-Pechora Basin 1008)

TOTAL PETROLEUM SYSTEM: South and North Barents Triassic-Jurassic (105001)

ASSESSMENT UNIT: South Barents and Ludlov Saddle (10500102) (frontier)

DESCRIPTION: Assessment unit includes the South Barents Basin Province 1050 (170,000 sq km) and the Ludlov Saddle Province 1059 (26,000 km) adjacent to the north.

SOURCE ROCKS: Probable source rocks are deeply buried gas-prone Lower to Middle Triassic shales.

MATURATION: Assessment unit includes the deepest burial histories for the Total Petroleum System, and local maturation might have been as early as Late Triassic.

MIGRATION: To charge young (post-Cretaceous) structural traps, the migration had to be mainly vertical from pre-existed accumulations (probably, basin-centered gas).

RESERVOIR ROCKS: Most of gas reserves are in Lower to Middle Jurassic siliciclastic reservoirs of shallow marine origin. Other reservoir rocks include mainly marine Triassic and Lower Cretaceous siliciclastics.

TRAPS AND SEALS: Most of known traps are gentle anticlinal uplifts. Significant potential for stratigraphic traps exists in Triassic rocks. Excellent seals are Jurassic and Triassic shales as thick as hundreds of meters; Upper Jurassic marine shale provides the best regional seal.

South Barents and Ludlov Saddle Assessment Unit - 10500102

EXPLANATION

- Hydrography
- Shoreline
- 1050 — Geologic province code and boundary
- Country boundary
- Gas field centerpoint
- Oil field centerpoint
- 10500102 — Assessment unit code and boundary

Projection: Equidistant Conic. Central meridian: 100. Standard Parallel: 58 30

**SEVENTH APPROXIMATION
NEW MILLENNIUM WORLD PETROLEUM ASSESSMENT
DATA FORM FOR CONVENTIONAL ASSESSMENT UNITS**

Date:..... 10/14/99
 Assessment Geologist:..... G.F. Ulmishek
 Region:..... Former Soviet Union Number: 1
 Province:..... South Barents Basin Number: 1050
 Priority or Boutique:..... Priority
 Total Petroleum System:..... South and North Barents Triassic-Jurassic Number: 105001
 Assessment Unit:..... South Barents and Ludlov Saddle Number: 10500102
 * Notes from Assessor No growth function. Major continuous gas accumulation may also exist.

CHARACTERISTICS OF ASSESSMENT UNIT

Oil (<20,000 cfg/bo overall) **or** Gas (≥20,000 cfg/bo overall):... Gas

What is the minimum field size?..... 20 mmboe grown (≥1mmboe)
 (the smallest field that has potential to be added to reserves in the next 30 years)

Number of discovered fields exceeding minimum size:..... Oil: 0 Gas: 4
 Established (>13 fields) Frontier (1-13 fields) X Hypothetical (no fields)

Median size (grown) of discovered oil fields (mmboe):
 1st 3rd 2nd 3rd 3rd 3rd
 Median size (grown) of discovered gas fields (bcfg):
 1st 3rd 31010 2nd 3rd 8060 3rd 3rd

Assessment-Unit Probabilities:

Attribute	Probability of occurrence (0-1.0)
1. CHARGE: Adequate petroleum charge for an undiscovered field ≥ minimum size.....	1.0
2. ROCKS: Adequate reservoirs, traps, and seals for an undiscovered field ≥ minimum size.....	1.0
3. TIMING OF GEOLOGIC EVENTS: Favorable timing for an undiscovered field ≥ minimum size	1.0

Assessment-Unit GEOLOGIC Probability (Product of 1, 2, and 3):..... 1.0

4. **ACCESSIBILITY:** Adequate location to allow exploration for an undiscovered field
 ≥ minimum size..... 1.0

UNDISCOVERED FIELDS

Number of Undiscovered Fields: How many undiscovered fields exist that are ≥ minimum size?:
 (uncertainty of fixed but unknown values)

Oil fields:.....min. no. (>0) 1 median no. 4 max no. 10
 Gas fields:.....min. no. (>0) 20 median no. 120 max no. 300

Size of Undiscovered Fields: What are the anticipated sizes (**grown**) of the above fields?:
 (variations in the sizes of undiscovered fields)

Oil in oil fields (mmbo).....min. size 20 median size 40 max. size 800
 Gas in gas fields (bcfg):.....min. size 120 median size 400 max. size 80000

AVERAGE RATIOS FOR UNDISCOVERED FIELDS, TO ASSESS COPRODUCTS

(uncertainty of fixed but unknown values)

<u>Oil Fields:</u>	minimum	median	maximum
Gas/oil ratio (cfg/bo).....	1500	2500	3500
NGL/gas ratio (bnl/mmmcf).....	30	60	90
<u>Gas fields:</u>	minimum	median	maximum
Liquids/gas ratio (bnl/mmmcf).....	10	20	35
Oil/gas ratio (bo/mmmcf).....			

SELECTED ANCILLARY DATA FOR UNDISCOVERED FIELDS

(variations in the properties of undiscovered fields)

<u>Oil Fields:</u>	minimum	median	maximum
API gravity (degrees).....	35	42	52
Sulfur content of oil (%).....	0	0.02	0.05
Drilling Depth (m)	1800	3000	5000
Depth (m) of water (if applicable).....	10	150	350
<u>Gas Fields:</u>	minimum	median	maximum
Inert gas content (%).....			
CO ₂ content (%).....			
Hydrogen-sulfide content (%).....		0	
Drilling Depth (m).....	1800	3000	6500
Depth (m) of water (if applicable).....	10	150	350

**ALLOCATION OF UNDISCOVERED RESOURCES IN THE ASSESSMENT UNIT
 TO COUNTRIES OR OTHER LAND PARCELS** (uncertainty of fixed but unknown values)

1. Russia represents 100 areal % of the total assessment unit

<u>Oil in Oil Fields:</u>	minimum	median	maximum
Richness factor (unitless multiplier):.....	_____	_____	_____
Volume % in parcel (areal % x richness factor):...	_____	100	_____
Portion of volume % that is offshore (0-100%):.....	_____	100	_____
 <u>Gas in Gas Fields:</u>	 minimum	 median	 maximum
Richness factor (unitless multiplier):.....	_____	_____	_____
Volume % in parcel (areal % x richness factor):...	_____	100	_____
Portion of volume % that is offshore (0-100%):.....	_____	100	_____

2. Province 1050 represents 85 areal % of the total assessment unit

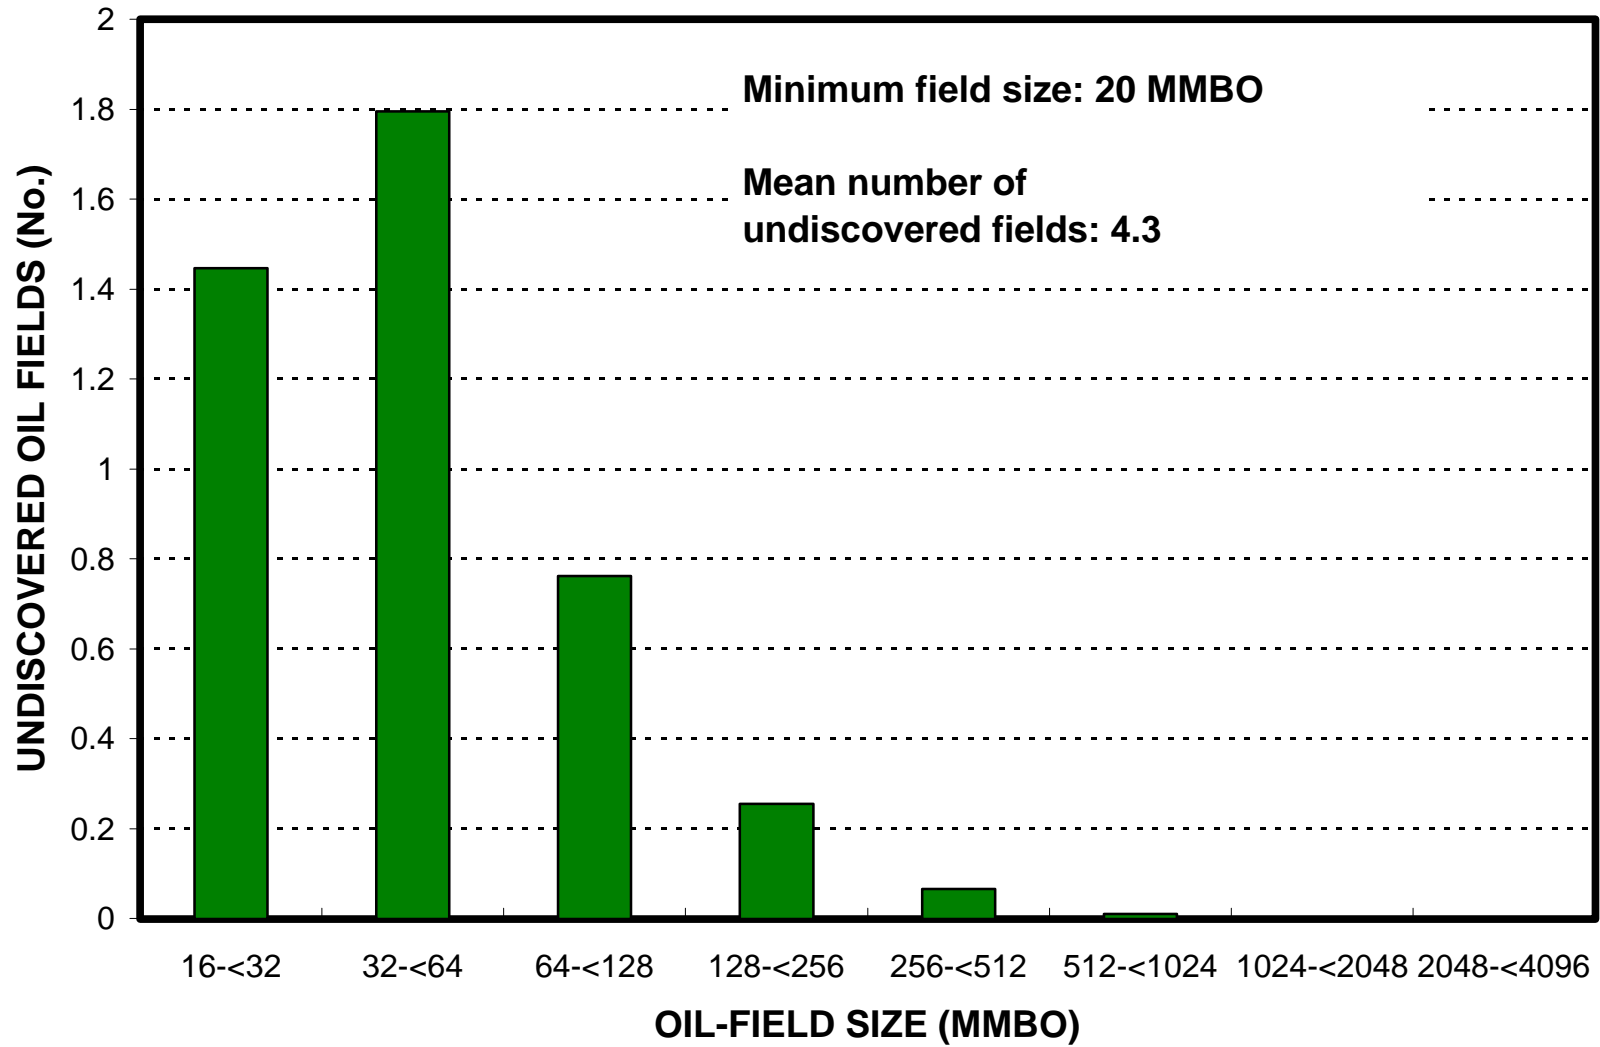

<u>Oil in Oil Fields:</u>	minimum	median	maximum
Richness factor (unitless multiplier):.....	_____	_____	_____
Volume % in parcel (areal % x richness factor):...	_____	85	_____
Portion of volume % that is offshore (0-100%):.....	_____	100	_____
 <u>Gas in Gas Fields:</u>	 minimum	 median	 maximum
Richness factor (unitless multiplier):.....	_____	_____	_____
Volume % in parcel (areal % x richness factor):...	_____	85	_____
Portion of volume % that is offshore (0-100%):.....	_____	100	_____

3. Province 1059 represents 15 areal % of the total assessment unit

<u>Oil in Oil Fields:</u>	minimum	median	maximum
Richness factor (unitless multiplier):.....	_____	_____	_____
Volume % in parcel (areal % x richness factor):...	_____	15	_____
Portion of volume % that is offshore (0-100%):.....	_____	100	_____
 <u>Gas in Gas Fields:</u>	 minimum	 median	 maximum
Richness factor (unitless multiplier):.....	_____	_____	_____
Volume % in parcel (areal % x richness factor):...	_____	15	_____
Portion of volume % that is offshore (0-100%):.....	_____	100	_____
