

CORE LOG

U. S. GEOLOGICAL SURVEY

DRILL HOLE 1 A LOCATION _____ ELEVATION _____ PAGE 1 OF 2
 DATE BEGUN 5/28/78 DATE COMPLETED 5/29/78 DRILLER McGabe Bros. LOGGED BY Robert Johnston TOTAL DEPTH _____
 CASING 32 Ft REMARKS: logged with limited geologic background

FROM	TO	THICK- NESS	LITHOLOGIC DESCRIPTION
32.2	37.0		Light gray very low grade shale
37.0	39.0		Medium gray moderately rich oil shale
39.0	39.2		Tan sandstone with traces of carbon trash
39.2	39.4		Brownish gray moderately rich oil shale
39.4	39.6		Tuft or siltstone (not sure)
39.6	41.3		Light gray to black, moderately rich oil shale
41.3	43.5		Whitish gray to medium gray very lean shale
43.5	46.5		Brown to black crumbly oil shale
46.5	48.7		Hard, medium gray oil shale
48.7	50.9		Medium gray to brown rich oil shale - crumbly in sections
50.9	51.3		Light brown shale marbled with coarse grain silt
51.3	52.0		Light gray lean oil shale - hard
52.0	52.4		Tuft - numerous dingy white layers of coarse grained material.
