Plug B.

1

A detailed stratigraphic column diagram showing lithology, grain size, and sedimentary structures across five profiles (A-E). The columns are labeled with depth in meters (m) from top to bottom. Profile A shows a thick section of 'Thk' (Thick) sand with 'F' (Frost) structures and 'Vf' (Very Fine) grain size. Profile B shows alternating 'Thk' and 'Thin' layers with 'F' and 'Vf' grain sizes. Profile C shows a 'Thk' layer with 'F' and 'Vf' grain sizes. Profile D shows a 'Thk' layer with 'F' and 'Vf' grain sizes. Profile E shows a 'Thk' layer with 'F' and 'Vf' grain sizes. The right side of the diagram contains handwritten notes describing the lithology and sedimentary features observed in each profile.
