THE BOSTONIAN

A handwritten geological log for Hole A, divided into three main sections by vertical lines. The left section shows thicknesses in feet (ft) from 10 to 20. The middle section shows thicknesses in inches (in.) from 0 to 10. The right section shows thicknesses in centimeters (cm) from 0 to 100. The log includes descriptions of rock types (e.g., M0 GY, L4 RD), fossil zones (e.g., V F SoG-E), and calcium carbonate content (e.g., CaCO₃, gn mds s/s). A note at the bottom indicates the hole was completed at 65 feet.

Lithology	Thickness (ft)	Thickness (in.)	Thickness (cm)	Fossils	CaCO ₃
M0 GY	10	0	0		
0 0	11	0	0
