A hand-drawn stratigraphic column diagram on lined paper. The left side features a vertical scale with major tick marks at 10-foot intervals, ranging from 70 at the top to 100 at the bottom. The diagram is divided into several layers by horizontal lines. From top to bottom, the layers are labeled as follows:

- Layer 1: A (red), Md Gy
- Layer 2: A (red), L+Gy
- Layer 3: VF SoG E
- Layer 4: L+RD Rd
- Layer 5: VF SoG E

To the right of the diagram, there are two columns:

- A column for CaCO_3 which contains two entries: one above the fourth layer and another below the fifth layer.
- A column for "HOLE COMPLETED" which contains the text "HOLE COMPLETED" and the number "105-".
