THE BOSTONIAN

This figure displays a vertical column of handwritten geological observations on lined paper. The observations are organized into five columns, likely representing different parameters or measurements. The data spans from approximately 20 at the top to 80 at the bottom. Key entries include:

- Column 1 (leftmost): Contains several short, illegible horizontal lines.
- Column 2: Contains the text "L YI BN" near the top, followed by "L GY" and "L M S" further down.
- Column 3: Contains the text "LIM S" near the top, followed by "LIM S" and "LR" further down.
- Column 4: Contains several short, illegible horizontal lines.
- Column 5 (rightmost): Contains several short, illegible horizontal lines.

The entire column is set against a background of vertical grid lines, and the page shows signs of age and wear, particularly a brown stain in the lower right corner.
